

ATIA Chicago 2009 Passport To Prizes Program

PRICE — \$300

Generate the most leads and get your company recognized at the ATIA Conference when you purchase the ATIA Passport to Prizes program. This program is ideal for new or small sized companies. It drives traffic to the booths of participating vendors and generates additional floor traffic throughout the entire Exhibit Hall. The more you get involved, the more you will reap the benefits. Exhibitors must provide the prize.

How Does the Passport to Prizes Program Work?

Each ATIA conference attendee is issued a blank passport card at registration. Attendees carry their card around the Exhibit Hall Wednesday, Thursday and part of Friday. Then, attendees will collect stamps from the participating exhibitor companies listed on their passport. Once attendees have completed their passport card, they will take it to the ticket tumbler at the front of the Exhibit Hall. All completed entries are eligible for a prize drawing that will be conducted Friday afternoon. Exhibitors will display the prize in their booth throughout the show until the drawing. Winners must be present to win.

Passport to Prizes Participants Will Receive:

- Recognition during the giveaway ceremony of your prize description and company name.
- Visibility/signage with the company logo/name.
- Your company name/logo and prize on the passport game card.
